

Within LeagueAthletics.com, you have the ability to sync teams' schedules with your calendaring program, such as iCal, Outlook, and Google Calendar. The steps below show you how to do this.

From your phone or computer, go to syaabaseball.com

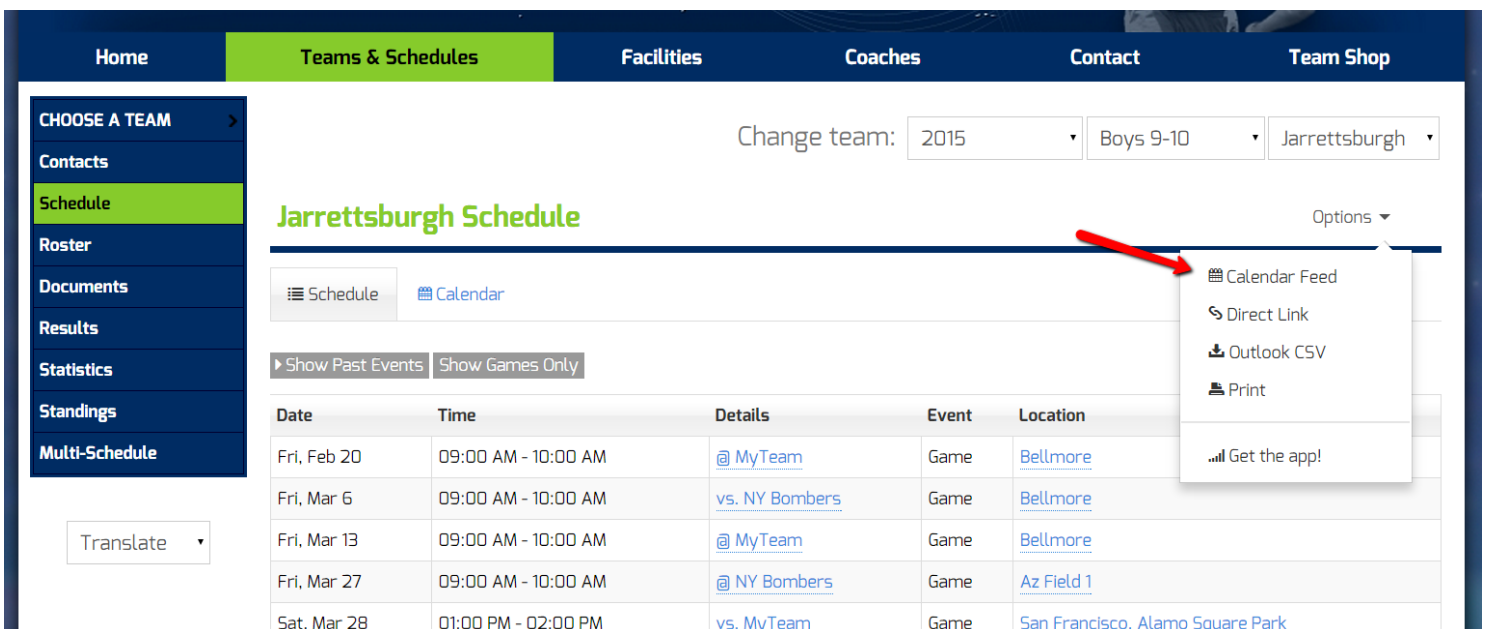

Select Full Site (do not use the app or mobile site or you will not see the option for the calendar feed)

1. Go to Teams & Schedules and Choose A Team, select your child's team

2. Navigate to a team's Schedule page within the website, from the Teams tab located in the horizontal navigation.

3. Once on the Schedule page, click Options in the top right corner of the page and then click "Calendar Feed". If you do not see the Calendar feed option the first time, go back and select the schedule again.

4. Finally, in the modal that opens up, click on the calendaring program you use. This will open the feed address in your calendaring program. You can also right click on the icon, copy the link and paste it into the calendaring application of your choice. This will add the games to your calendar as well as the practices as they are scheduled. You are subscribing to the calendar so changes to games and practices will automatically update on your calendar as well.
